## PROFILE SUMMARY

Accomplished and top-performing Technology Consultant with over 6 years of progressive experience in software implementation, database administration, Robotic Process Automation(RPA) and project management. Proven track record of evaluating current processes and envisioning ways to reengineer the process in order to create significant efficiencies and enhance controls. Broad-based expertise in end-to-end implementation of process automation using RPA, business process re-engineering, ETL, data analysis, technical and business requirements gathering and post-implementation support of RPA projects. Demonstrates ability to lead projects independently and manage internal and external client expectations on project requirements and deliverables. Skilled in translating business requirements to optimum solutions, complying with standards and policies. Possess problem-solving skills with the aptitude to identify strategic solutions to business problems.

## CORE COMPETENCIES

- Software Implementation
- Database Administration
- Robotic Process Automation
- Project Management
- Digital Transformation
- ETL Process
- Process Re-engineering
- Requirement Gathering
- Product Management
- Technical Documentation
- Client Engagement
- Business Case Analysis

## SKILLS HIGHLIGHT

- Solid, persuasive, and genuine communication, presentation, facilitation and relationship building skills.
- Leadership skills, superior analytical skills, team management, result-oriented, and interpersonal skills.
- Proven ability to collaborate on cross-functional teams without losing focus on the required balance between task and target.
- Strong analytical skills, including the ability to understand complex issues, gather and analyse data into trends, structure problems and design solutions.
- Proficient in the use of RPA tools like Blue Prism and UiPath and use of SQL Server Management Studio and Transact-SQL/PL/SQL (DDL and DML commands, Flow control, Stored Procedures, Functions).
- Familiar with programming languages like C#, VB.NET, C++, HTML.

## CAREER ACHIEVEMENTS

- Automated same day Bank ATM Reconciliation and reversal process, which streamlined the process and reduced the team from 20 to 3 members.
- Re-engineered and automated the loan recovery process and the customer profiling process within the bank, which resulted in a reduction in the workforce by over 80%.
- Automated the User Access Management operations across over 20 applications within the bank, which reduced TAT by over 65%.

## PROFESSIONAL EXPERIENCE

### Senior Technology Consultant – EY

Dec 2018 – Present

- Conduct process assessments to determine suitability for automation and perform business case analyses to select and prioritise processes for automation.
- Provide development and testing support, and follow the implementation of standards and best practices that aligns with business objectives and automation plan.
- Work across organisations to provide business process or design recommendations consistent with long term business and IT strategy.
- Maintain RPA bots as batch processes on daily basis and ensure quality and high performance to the internal and vendor applications of the organisation.
- Drive the strategic and tactical rollout of the solution to enterprise customers by creating and documenting test procedures and scenarios.

### Software Implementation Consultant – SterlingPRO Business Applications

Jun 2018 – Nov 2018

- Deployed, implemented and supported TWIG Secure, a financial application solution on the ATM/POS for instant pin generation, pre-authorisation of cards for pin selection
- Supported the deployment of MONIT(IntelliCam), a solution that provides ATM monitoring with an intelligent camera that detects when a face or camera is blocked
- Managed the database of financial application solutions and also optimised the database for effective querying.
- Implemented ATM downloads on Postilion by creating loadsets and modifying states and screens.

- Demonstrated in-depth understanding of the structure of ISO 8583 messages and how they were routed with their response codes.
- Championed the implementation of projects from inception to go-live and also provide post-deployment support.

**Software Implementation Consultant** – Precise Financial Systems Ltd

**Dec 2016 – May 2018**

- Deployed, implemented and supported a fully automated accounting reconciliation solution (CLIREC) for financial institutions in Nigeria and Africa such as Central Bank of Nigeria, Ecobank Transnational Inc., Sterling Bank, First City Monument Bank, etc.
- Performed troubleshooting on various client's issues and resolved related issues on time and to client's satisfaction.
- Worked with clients and project managers to determine deployment requirements.
- Generated and deployed reports for clients using a well-optimised ETL process to get up-to-date data.
- Collaborated with in-house client IT departments and managed services organisations in client project implementation initiatives.
- Customised training and materials for each client site based on business requirements and ensured training documentation and materials provided detailed instruction.
